July 2024 - Issue 22

Upcoming events

International Conferences CELDA, AC and ICWI 2024 October 26 – 28 2024, Zagreb, Croatia

The [21st International Conference on Cognition and Exploratory Learning in Digital Age](#) (CELDA 2024), [the 21st International Conference Applied Computing](#) (AC 2024) and the [23rd International Conference WWW/Internet](#) (ICWI 2024) will be hosted in Zagreb, Croatia from 26 to 28 October 2024.

21st International Conference on Cognition and Exploratory Learning in Digital Age

The [CELDA 2024](#) conference aims to address the main issues concerned with evolving learning processes and supporting pedagogies and applications in the digital age. There have been advances in both cognitive psychology and computing that have affected the educational arena. The convergence of these two disciplines is increasing at a fast pace and affecting academia and professional practice in many ways. Paradigms such as just-in-time learning, constructivism, student-centered learning and collaborative approaches have emerged and are being supported by technological advancements such as simulations, virtual reality and multi-agents systems. These developments have created both opportunities and areas of serious concerns. This conference aims to cover both technological as well as pedagogical issues related to these developments. Main tracks have been identified please check <http://www.celda-conf.org/call-for-papers>

21st International Conference Applied Computing

The [Applied Computing 2024](#) conference (AC 2024) aims to address the main issues of concern within the applied computing area and related fields. This conference covers essentially technical aspects. The conference is divided into more detailed areas, for more information please check <http://www.computing-conf.org/call-for-papers>

23rd International Conference WWW/Internet

The [WWW/Internet 2024](#) conference (ICWI 2024) aims to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have aroused.

This conference aims to cover both technological as well as non-technological issues related to these developments.

The conference accepts submissions in the following six main areas: Web 2.0; Semantic Web and XML; Applications and Uses; Services, Architectures and Web Development; Research Issues; Emergent Areas. For more details please check <http://www.internet-conf.org/call-for-papers>

*** Last Call For Papers - Important Dates:**

- Submission Deadline (Last CFP): **3 September 2024**
- Notification to Authors (Last CFP): **23 September 2024**
- Final Camera-Ready Submission and Early Registration (Last CFP): **Until 2 October 2024**
- Late Registration (Last CFP): **After 2 October 2024**

*** Paper Submission**

These are blind peer-reviewed conferences. Authors are invited to submit their papers in English through the conferences' submission systems.

Submissions must be original and should not have been published previously.

**Join us in Zagreb, Croatia!
26 – 28 October 2024**

Keynote Speakers

CELDA 2024

Dr. Panagiotis Kampylis,
Greek National Documentation Centre,
Greece

Dr. Panagiotis Kampylis is a Policy and Data Analyst of Digital Transformation at the Greek National Documentation Centre. He graduated from Jyväskylä University (Finland) with his PhD in creativity. He worked from 2012 to 2020 as a project leader at the European Commission's Joint Research Centre, where he led the development of the European Framework for Digitally-Competent Educational Organisations (DigCompOrg), the development of SELFIE tool for schools' digital capacity and the Entrepreneurship Competence Framework (EntreComp). His research interests include digital and entrepreneurship competences, creativity, computational thinking, innovation, and digital transformation of economy and society. He has published extensively in these fields (5500+ citations) and delivered keynotes at various events in Greece and abroad.

ICWI 2024

Prof. Dr. Claudia Loebbecke
Dept. of Media and Technology
Management, University of Cologne,
Germany

Prof. Dr. Claudia Loebbecke, M.B.A. holds the Chair of Media and Technology Management at the University of Cologne, Germany. 2005-2006 she was the first female President of the global Association for Information Systems (AIS), which named her AIS Fellow in 2012 and a Distinguished Member cum laude in 2019. For more than 30 years, Claudia has served as senior editor and in other editorial roles of prestigious academic IS journals. She is a member of the European Academy of Sciences. Prior to her appointment at the University of Cologne, Claudia worked at INSEAD, McKinsey & Co., Hong Kong University of Science and Technology, Erasmus University, and Copenhagen Business School. As a senior research-active academic, she has undertaken short-stay research visits to universities in the US, Australia, the UK, Italy, and France. Claudia holds Master and PhD degrees from the University of Cologne and an MBA from Indiana University in the US – the latter supported by a Fulbright Grant and a DAAD Scholarship. Her research, published over 250 internationally peer-reviewed journal articles and conference papers, focuses on technology developments, business transformation, and management in light of digital and creative innovations – not only, but also in media industries. She considers academic exchanges and conferences such as the WWW/Internet 2024 Conference as crucial for learning, democratizing knowledge generation, and peacemaking in our increasingly digital world. Please find her CV and list of publications under www.mtm.uni-koeln.de/team-loebbecke-home.htm.

“Data Analytics and Artificial Intelligence in Business, Society, and Academia: Opportunities and Risks beyond the Technological Hype”

Abstract: The processing capacity of today’s smartphone outperforms the computers that landed a man on the moon in 1969 and it seems ‘normal’. Data Analytics and Artificial Intelligence (AI) drive fundamentally transformed business models and management approaches, thereby scrutinizing established economics, education paradigms, and human habits. As impressive examples become popular, the disruptive effects will not spare those who underestimate their increasing momentum. This keynote will outline how ‘new normal’ AI and data analytics transform, empower, and challenge organizations and humans as they
