The International Conference on e-Learning (part of the IADIS Multi Conference on Computer Science and Information Systems 2007) had its first edition held in Lisbon, Portugal, 6-8 July, 2007.

This conference was organized by the International Association for Development of the Information Society (IADIS).

The main purpose of this Conference was to address the main issues of concern within e-Learning, trying to enclose both technical as well as the non-technical aspects of e-Learning.

The 2007 e-Learning Conference received 342 submissions from more than 39 countries. Each submission had been blindly reviewed by an average of three independent reviewers, to ensure that accepted submissions were of a high standard. Consequently, only 68 full papers were approved which meant an acceptance rate below 20 %. A few more papers were accepted as short papers, reflection papers and posters.

Extended versions of the best papers were selected to be published in:

- International Journal of Information and Communication Technology Education (IJICTE) ISSN: 1550-1876.

Besides the presentation of full, short and reflection papers and posters which divided the conference program in 29 parallel sessions, the conference also included two keynote presentations from internationally distinguished researchers (Professor George Siemens, Associate Director, R&D Learning Technologies Centre, University of Manitoba, Canada, and Professor Gráinne Conole, The Institute of Educational Technology, The Open University, UK).
Keynote Presentation:

MAKING SENSE OF TODAY’S TECHNOLOGY-ENHANCED ENVIRONMENT FOR LEARNING: RETHINKING STUDENT AND TEACHER ROLES

by Professor Gráinne Conole, The Institute of Educational Technology, The Open University, UK

Keynote Presentation:

APOPHENIA: UNDERSTANDING AND MEANING IN INFORMATION ABUNDANCE

by Prof. George Siemens, Associate Director, R&D Learning Technologies Centre, University of Manitoba, Canada

In general, this edition offered for the first time a great opportunity to all their participants to discuss with success the most significant aspects regarding the developing concept of e-Learning..
