The 7th edition of the Interfaces and Human Computer Interaction 2013 (IHCI) International Conference was held in Prague, Czech Republic, during 22 to 24 July, 2013 and was co-organised by The University of Economics in Prague (VŠE), Czech Republic. This conference was part of the IADIS Multi Conference on Computer Science and Information Systems 2013, 22 - 26 July.

Co-Organised by:

The Interfaces and Human Computer Interaction 2013 conference addressed the main issues of concern within Interface Culture and Design with a particular emphasis on the affective aspects of design, development and implementation of interfaces and the generational implications for design of human and technology interaction. This conference aimed to explore and discuss innovative studies of technology and its application in interfaces.

The IHCI 2013 conference tried to cover both technological as well as non-technological issues related to these developments.

The proceedings of the Interfaces and Human Computer Interaction 2013 Conference were jointly published with the Game and Entertainment Technologies 2013 Conference. These events received 155 submissions from more than 29 countries. Each submission has been anonymously reviewed by an average of five independent reviewers, to ensure that accepted submissions were of a high standard. Consequently only 27 full papers were approved which means an acceptance rate of 17%. A few more papers were accepted as short papers, reflection paper and posters.

An extended version of the best papers were selected to be published in:

- the IADIS International Journal on WWW/Internet (ISSN: 1645-7641)

Besides the presentation of full papers, short papers, reflection paper and posters, the conference also included one keynote presentation.

Keynote Presentation:
INTEGRATING INTERACTIVE AND COMPUTATIONAL ANALYSIS IN VISUAL ANALYTICS

by Dr. Helwig Hauser, University of Bergen, Norway

The IHCI 2013 Conference proceedings were published in Book (ISBN: 9789728939908) by IADIS Press.
